Features and Benefits

- Simple integration allows administrators to add AMAG Symmetry Integration for direct communication
- Receive events and personal data
- Send commands to hardware devices
- Create rules based on relevant events
- Create and deploy tasks on maps or devices for ease of use
- Customize commands to reduce training time

Manage AMAG Symmetry from within the Senstar Symphony™ Common Operating Platform
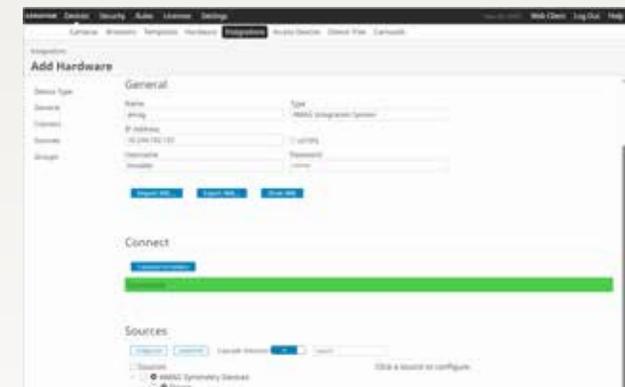

Senstar Symphony™ includes built-in support for AMAG Symmetry, allowing operators to receive events from the AMAG Symmetry system and trigger alarms based on these events.

Whether it's locking down doors and specific areas or granting remote access, tasks can be easily automated.

Elevate your security infrastructure effortlessly with Senstar's innovative integration. This solution features a user-friendly interface that integrates seamlessly with a single UI, eliminating unnecessary complexity and saving valuable time and resources for operators, integrators, and solution owners alike.

In order to use this feature, a license is needed from Senstar to allow a single connection to your AMAG Symmetry instance. A connection license on your AMAG system is also required to connect with the Senstar integration.

SKU: S8SW3022-XXY - Senstar Symphony™ AMAG Symmetry Integration.

Configuration of the AMAG Symmetry Integration is performed within Senstar Symphony's web-based setup, making configuration quick and easy.
