

### Features and Benefits

- Simple integration allows administrators to add Salto Space Plug-in for direct communication
- Receive events and personal data
- Send commands to hardware devices
- Create rules based on relevant events
- Create and deploy tasks on maps or devices for ease of use
- Customize commands to reduce training time

### Manage Salto Space Plug-in from the Senstar Symphony™ Common Operating Platform

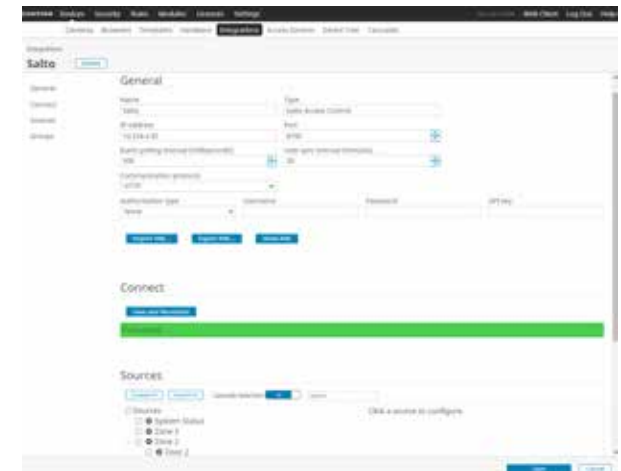

Senstar Symphony™ includes built-in support for On-Premise Access Control Salto Space Plug-in.

Tasks can be easily automated, whether it's locking down doors and specific areas, or granting remote access.

The solution features a user-friendly interface that seamlessly integrates with a single UI, eliminating unnecessary complexity and saving valuable time and resources for operators, integrators, and solution owners alike. Elevate your security infrastructure effortlessly with Senstar's innovative integration.

In order to use this feature, a license is needed from Senstar to allow a single connection to your Salto Space Plug-in instance. A connection license on your Salto system is also required to connect with the Senstar integration.

SKU: S8SW3023-XXY - Senstar Symphony™ Salto Space Plug-in Integration.

Configuration of the Salto Space Plug-in is performed within Senstar Symphony's web-based setup, making configuration quick and easy.
