Product Retirement Notice – Data Collection Unit

DCU Product Retirement

Senstar herein informs its valued customers, dealers, and representatives of the planned retirement of the Data Collection Unit (DCU).

Senstar's DCU provides an interface between the Senstar FPS series of fence sensors and other CEnDe-protocol sensors and transponders (MPS-4100 microwave and stand-alone transponder) to third-party security management systems. The DCU can interface to 3rd-party systems via serial port, Ethernet connection, USB, or relays.

Given the introduction of successor products such as the MX-7000 control system and increasing levels of component obsolescence affecting the DCU, Senstar is now announcing the following Product Retirement milestones for the DCU:

Date	Milestone
04-May-2015	Product Retirement Notice issued (this bulletin), affected products are still available for new sales
31-Dec-2015	Product no longer available for new sales, repair services remain available
31-Dec-2018	Repair services transition to a Best Effort basis
tbd	Complete end of life – all repair services discontinued

The affected products include all DCU versions. See Table 1 below for a detailed list.

Product Migration

The MX-7000 control system is a newer generation Senstar product that includes all the capabilities of the DCU.
