## ABOUT ADVANCIS

Since 1994 Advancis provides the security, safety and building management industry with its highly flexible and open architecture command & control system, WinGuard PSIM.

Advancis is committed to open architecture and vendor neutrality since its foundation. Our command & control technologies provide clients with freedom of choice and the ability to unify disparate system brands of all types into a single management application that offers enhanced security and greater system efficiency. WinGuard also reduces operational costs and provides a rapid return on investment.

Advancis is a constant innovator with regular product improvements and developments for the global PSIM market.

## TECHNOLOGY PARTNER PROGRAM

We work in close partnership with an ever growing community of technology partners around the world, with currently over 470 integrations to best of breed vendors.

With this close cooperation we can achieve a deep integration of our technology partners' systems and a comprehensive functional scope. Regular communications and meetings with the partners technical personnel ensures that our driver interfaces are always state of the art.

Advancis employs highly skilled and qualified employees who provide excellent support to fulfill the ongoing needs of our joint customers. Our joint value solution with partners generates greater market awareness and cross selling potential.

## PREMIUM PARTNER - SENSTAR

With intelligent video management, video analytics, access control, and innovative perimeter intrusion detection systems, Senstar offers a comprehensive suite of proven, integrated technologies.

Senstar products have been protecting critical assets around the world for 40 years. Key to our longevity and success is the ability to deliver leading-edge security and risk management solutions, backed by deep industry knowledge and world-class support.

Senstar protects high risk assets in markets that require high levels of security—including critical infrastructure, military, manufacturing and logistics, corrections, energy, and transportation.

With corporate offices in strategic locations worldwide and products operating in more than 100 countries, Senstar has an extensive global presence in the security market. Our presence is extended further through the cooperation of a global network of qualified partners.

“

*At Senstar we are proud to work with Advancis to deliver a highly available system from top to bottom,” said Tom Hofer, Product Manager at Senstar. “The integrated WinGuard and Symphony solution enables operators to save time because it presents them with important information when needed. The solution includes a VMS and analytics mechanism to provide data to the presentation layer for the best possible experience using state of the art software solutions.*

”

## JOINT SOLUTION

Managing all data points, enables the operators to quickly and purposefully fulfill the tasks set. On the other hand, the archive of all messages provides the basis for forensic and thus gapless documentation.

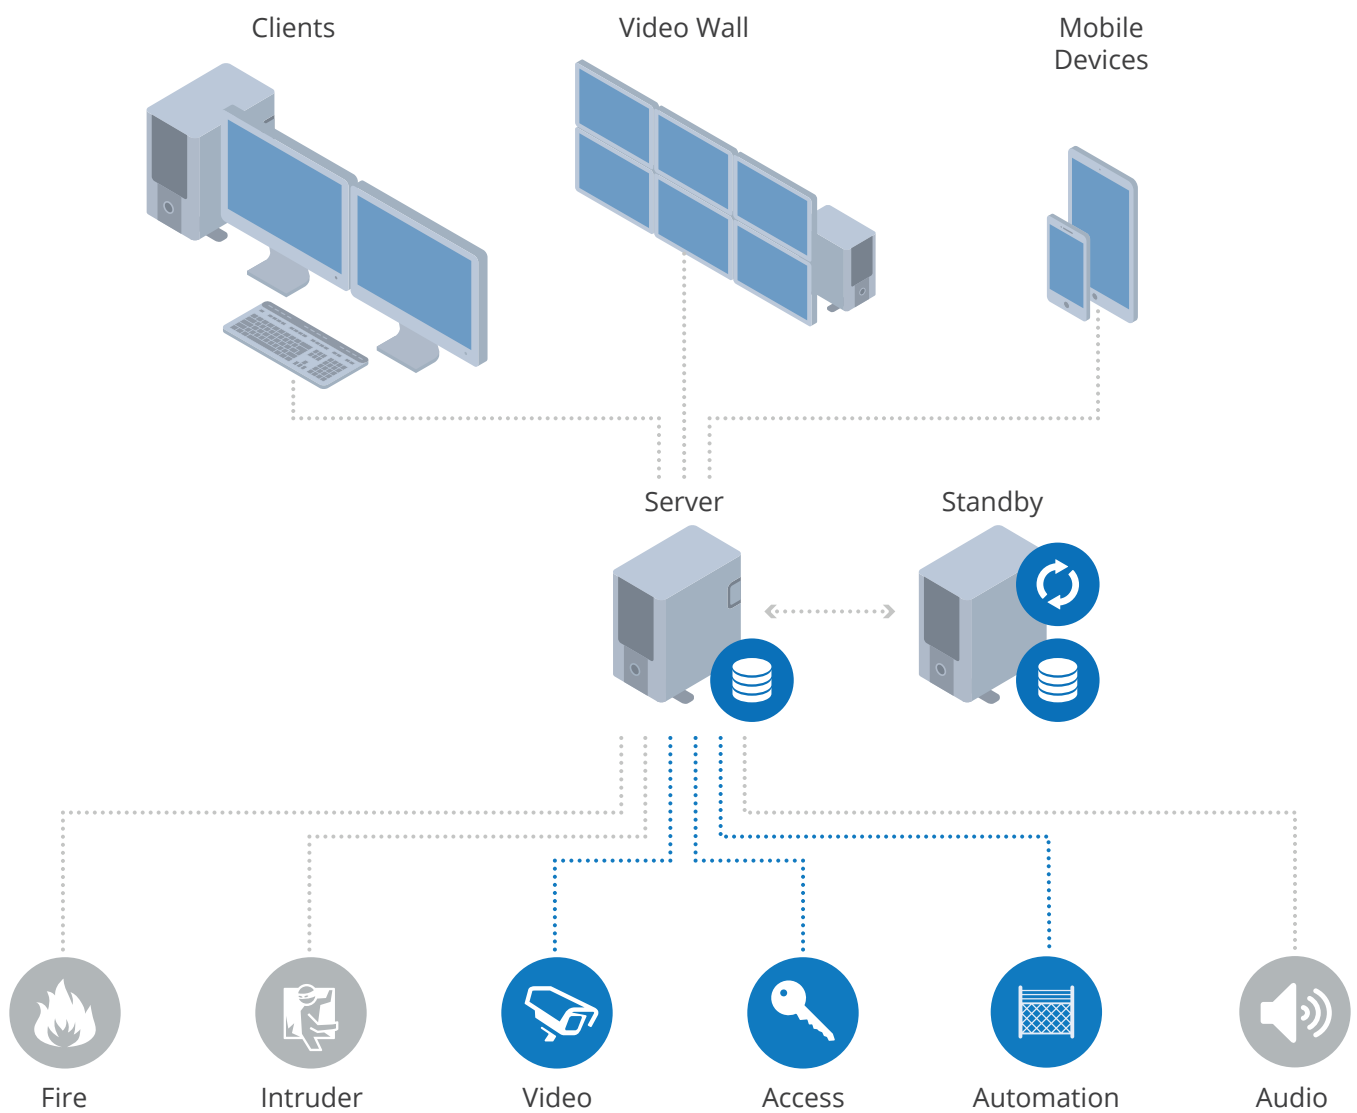

- ✓ Open platform solution for complete infrastructure integration and management
- ✓ Flexible user interfaces that adapt to customer requirements
- ✓ Guided process instructions support the user in event processing
- ✓ Reports offer a quick overview of relevant key information
- ✓ Mobile apps provide insight to all incidents and operations at any time
- ✓ Scalability from a single workstation to multiple control centres with redundancy and failover

- ✓ Open, highly scalable video management system with built-in video analytics, includes full-featured access control and perimeter intrusion detection modules
- ✓ Supports High Availability with server, database and storage redundancy
- ✓ Single pane of glass displays all events and information from VMS, PIDs and AC
- ✓ Sensor Fusion Engine is breakthrough technology that achieves levels of performance that exceed those of individual sensors
- ✓ Wide range of perimeter intrusion detection sensors including fence, buried, wall, fiber optic and microwave that detect and locate intruders at the perimeter
