

Distribution	Internal/External – Public Notice
Bulletin #	2022PB013A
Date	October 31 st , 2022
From	Brad Martin
Subject	Important A10D Thin Client Update

This communication is to keep our customers informed of the challenges Senstar has faced over the past 18 months with respect to A10D Thin Clients.

Senstar recognizes that our customers have been waiting patiently for their A10D Thin Clients to arrive. Unfortunately, the A10D has been heavily impacted by component shortages caused by the global supply chain crisis. Senstar continues to pursue all available means to address these issues.

As the component market is still highly uncertain, with changes occurring on a daily basis, we are anticipating to fulfill the entire backlog of orders in Q1, 2023. Senstar will inform customers when new information regarding delivery dates is available.

Thank you for your patience and support. Senstar is eagerly looking forward to an easing of supply chain constraints in 2023 and the resumption of Thin Client production.
